**COMPANY
PROFILE**

ABOUT **LEANO ENERGY**

It is believed that a country's future is in the hands of its youth and with that said, this company opens doors to broaden that horizon. There is still much to learn from the elders and yet so much to improve in binary thinking. Being a youth owned company we delight in innovative ideas, design thinking and formatting ideation that isn't the norm to business as the market is constantly evolving and changing.

Leano Energy is a LEVEL 1 BBBEE contributor, with the company being 100% black youth owned it allows the company a platform to have a new outlook on the market and come up with innovative and exciting ideas of not only lowering cost but design comprehensive marketing. We are a licensed wholesale and distributor in bulk fuels, diesel, paraffin, oils and various lubricants. The company provides its products to clients in Gauteng, Mpumalanga, Limpopo and the North West province. Leano Energy offers energy solutions to all industries including mining, agriculture, logistics, airports, factories and municipalities to ensure profitable growth.

We include fuel management service where tanks are installed on site for the clients and how much fuel they use on a monthly basis is monitored and ensured to always get re-fueled on time and efficiently. Through this management system as well as our tailored prices are guaranteed to cut our clients fuel cost while providing quality products.

OUR VISION

Our company is developed on sustainable values and creating empowerment opportunities in South Africa, whilst striving to promote sustainable energy.

OUR MISSION

Leano Energy aims enter the green energy market, by promoting renewable energy together with high quality and affordable services.

OUR VALUES

Leano Energy conducts its business with integrity and is committed to meeting and exceeding its customer expectations to ensure customer retention.

OBJECTIVES *Leano Energy strives to:*

- Have quick, efficient, on-time delivery to all their customers.
- Provide their customers with stable, non-fluctuating prices of fuel.
- Develop sustainable customer relationships, so as to ensure there is a level of trust and respect between themselves and their customers.
- Combine technology and efficiency into their daily doings, so as to make their jobs easier to complete.
- Promote sustainable energy.
- Be as eco-friendly as possible.
- Safely supply their customers with storage tanks, as well as keep record of the customer's monthly usage, therefore, cutting the cost of their trucks or plant machinery.

PRODUCTS & SERVICES

50PPM)*

**Illuminating
Paraffin**

**Oils and
Lubrications**

PRODUCTS & SERVICES

Leano Energy has established relationships with major refineries within South Africa such as Sasol, Shell, BP, Engen, and Chevron. Our supplier relationships has provided us the capacity to provide large volumes of all products, this allows us to ensure that all our clients needs are met and at the best possible prices.

Our price monitoring system enables us to source products at highly competitive prices which in turn enables us to distribute it to our clients at comparatively low margins.

We offer a wide range of petroleum products, refined with the best petroleum management solutions.

- Petrol Unleaded (93,95ULP)
- Diesel (50,500PPM)
- Illuminating Paraffin
- Oils and Lubrications Biofuel

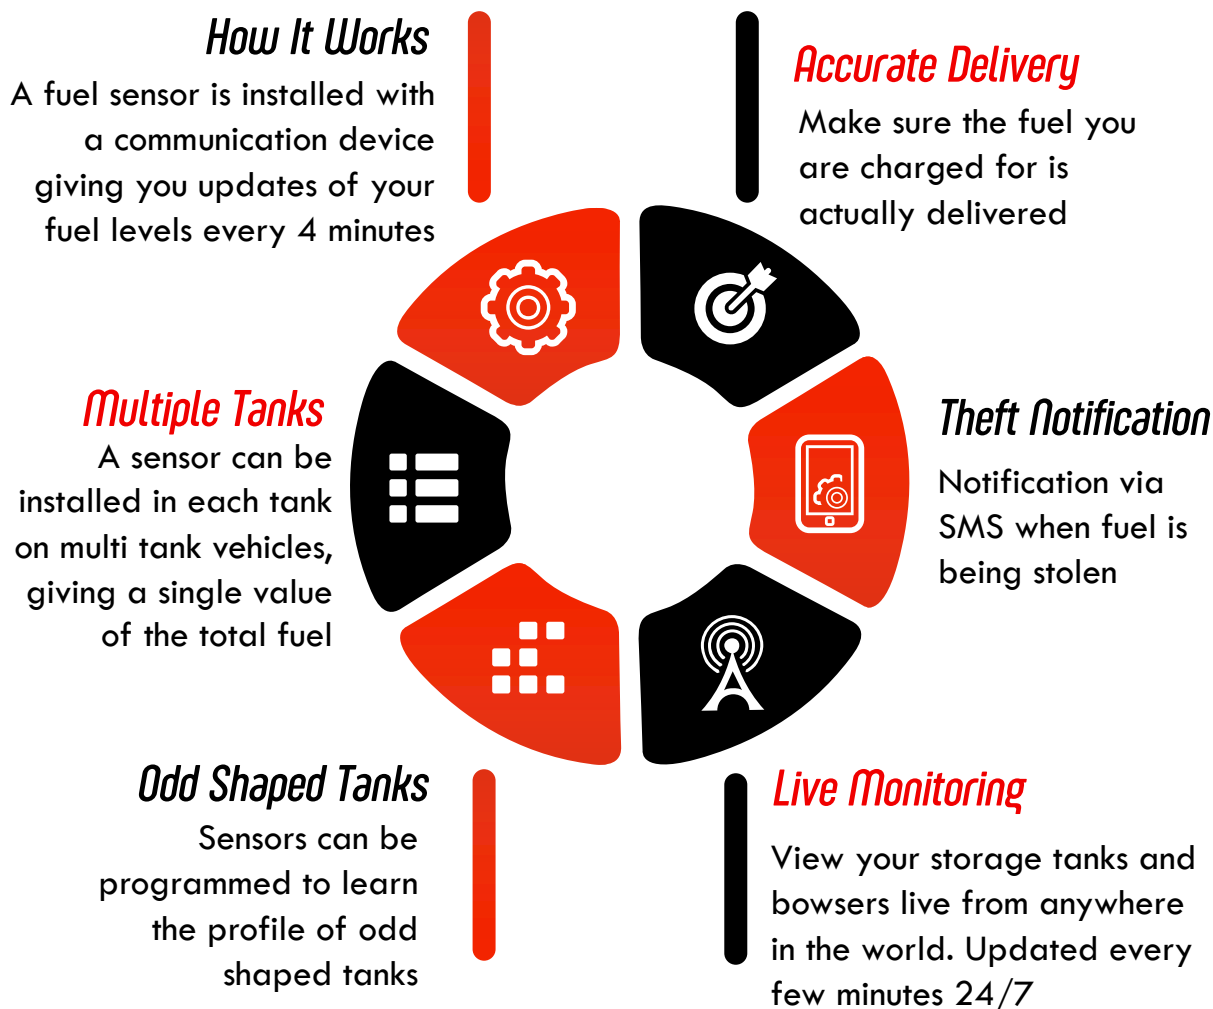

Infrastructure

Part of the services offered at Leano Energy is installation of new and reconditioned diesel storage tanks and bowzers on our clients premises for their convenience. We install above ground tanks in all sizes, we cater to any specification that our clients require. All our diesel tanks are coupled with pump sets.

Fuel Management Solutions

Fuel theft occurs in several ways including siphoning from the tank, filling extra containers at the garage whilst refuelling and obtaining slips for amounts exceeding the actual volume filled. With our management these problems can be eliminated, and the other benefits of the system are sure to make your business more profitable.

COMPARATIVE ADVANTAGES

We are a one-stop shop providing all energies needed to function and with that said, we also provide blended bio-fuel which is an innovative and renewable source of energy which is less harmful to the environment yet cleaner and safer for engines to use, because the levels of global warming are increasing at such a rapid speed.

At Leano Energy, we have aligned ourselves with local and accredited logistic entities in order to ensure all deliveries are done on time and in the best possible manner. Our purpose is ensuring our clients derive the greatest value from our fuel and lubrication solutions. We have access to all oils and lubricants from engine oils, gear oils, drive train oils, hydraulic oils, compressor oils and industrial oils. Leano Energy can supply all your oil and lubricant needs at the best possible prices.

The demand for fuel management has reached a point where it is almost becoming a standard requirement for any operations manager. Installing our fuel management solution has clear and defined quantitative benefits to company, streamlining fuel expenditure through effective live monitoring reporting & management. Once installed and calibrated the user can expect average accuracies of 99% or better.

SUPPORTIVE CULTURE

With South Africa being a developing country there is a lot of room for improvement, and with that said giving back to the youth and empowering the African child is one of Leano's deepest desires.

The root of empowerment lies in education as it is the one tool that can never be taken away from an individual. Therefore Leano plans to develop an education fund that affords children to go study fields of chemical engineering, mining and construction through a financial aid plan. This is a core issue that is hindering economic growth and development in South Africa.

Through these industries we have the ability to promote sustainable growth through renewable energies, ensuring future generation a clean and healthy environment. This is a philosophy of ours we feel is a responsibility to teach.
